Focus Week 1

Monday 17th February is the beginning of the 2014 Focus Week program. The regular timetable ceases and students commence the first of eight rotations through week long learning units. Students will concentrate their entire core learning time on one major topic, which allows them to delve deeply into a specific challenge. Each program addresses Year 9 students’ needs by providing relevant learning experiences which help develop 21st century skill. They will collaborate, think creatively, problem solve and develop products for an authentic purpose or audience. It is a unique learning experience but through Focus Weeks, students also address the core outcomes of the regular program.

A number of Focus Week programs involve offsite learning so please ensure that permission notes are returned to reception if required.
