Swimming Carnivals

Last week we had both the Senior School and Middle School House Swimming Carnivals at St Albans Leisure Centre. There was a great deal of participation by students in a wide variety of events and Curie House was successful on both days. These carnivals provide one of the first opportunities for students to show leadership by organising their House teams and the House Captains were very impressive in handling the complexities of the day. The carnivals are also opportunities for students to stake their claim for the College Swimming Team, which will soon be participating in the ACS Swimming Carnival.

One of the members of the sport team at the College, Hannah Wilson, has left her current role to undertake tertiary studies in education and her last day was on Friday at the Middle School House Swimming Carnival. Hannah is a former student of the College, who has worked with the sport team for several years and we wish her well in her quest to enter the teaching profession.

Saturday’s Working Bee

In very warm conditions, parents worked hard on a number of projects. In particular, Cameron Griffiths has done an outstanding job developing the new garden bed outside the Penman Centre and, on Saturday, the metal edging of the project and the new arch were added to the rockery, which he created during the week using rock taken from the Taylors Lakes Campus.

At this time of the year, mowing is an ongoing task and the photo below shows work on the Robertson Rose Garden, which was looking fabulous by the end of the day.
I thank all parents who attended on Saturday.
